SUFFOLK REGISTRATION INSTRUCTIONS

Use a separate form for dams recorded in different ownerships.

The United Suffolk Sheep Association offers several registry programs in addition to the purebred registry. Information on these programs is provided below.

PERCENTAGE REGISTRATION: This program is for Suffolk breeders to identify and maintain records on their non-purebred replacement seedstock.

1. In order to record an animal in the USSA Percentage Registration Program, you must be a member in good standing of USSA or UJSSA.
2. At least one parent must be registered in the USSA purebred flock book or the Percentage Registry.
3. Percentage animals must be identified by permanent positive identification.
4. An animal with a percentage registration number will not be permitted to enter the purebred flock book nor will any of its progeny until the 15/16 level of purity is reached. Percentage animals will always have a percentage notation listed on their papers to indicate their origins.

SUFFOLK GAP: This program is for Suffolk breeders who own Suffolk ewes whose papers have not be maintained for generations. You must be the breeder of these ewes and be able validate their genetic heritage to the best of your knowledge. Initial program application is required. An inspection, either physical or quality photographs, a head shot and a side view, will be necessary to complete the registration process. Contact a USSA director in your district to work out inspection details. Once the application is submitted, an inspection approves the ewes, and registration fees are paid, these ewes will be entered in the Suffolk flock book as 75% registered Suffolks. RAMS ARE NOT ELIGIBLE TO INITIALLY ENROLL IN THIS PROGRAM.
